WHITEPAPER
V 1.0

1. Introduction

AZHI TOKEN (AZHI) Built on Binance Smart Chain (BSC) blockchain network, All content that you purchase from Azhi Token, such as games, NFT, and virtual items, is an on-chain digital item that you truly own.

AZHI Token which is a project focused on community strength that seeks to provide financial opportunities to all people from all places. Decisions about the future of AZHI will be made by many AZHI holders through the community. The AZHI community focuses on NFT projects, staking, and making Metaverse. There is no hierarchical structure, so that any innovative idea can be put forward by anyone and all communities. With a strong community and decentralization is widely considered the most important aspect of AZHI in the future.

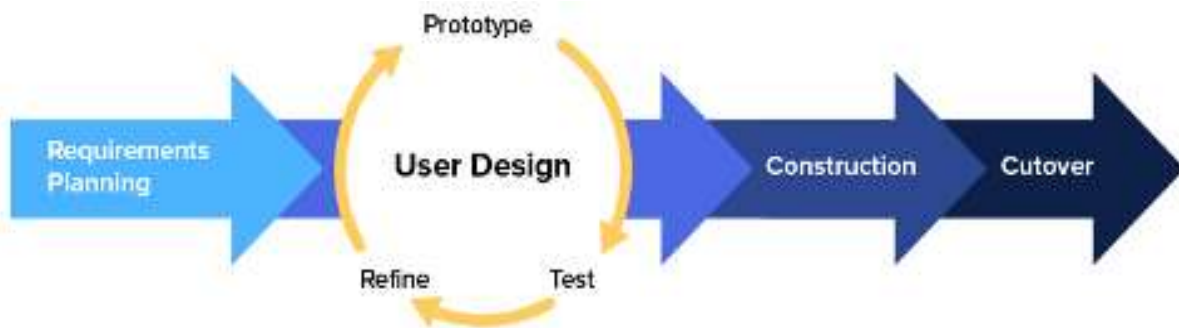

AZHI investors built by azhi token internally to see how much interest and contribution the team built by the azhi token team has. The number of azhi tokens held by the internal investor team is 294 million tokens that will be locked. Proceeds from internal investors will be used to finance the airdrop community built by the azhi token. Meanwhile, the number of azhi tokens intended for public investors is 105 million funds from public investors will be 100 percent and to meet the liquidity of azhi tokens so that the community built AZHI tokens can withdraw their funds at any time.

Currently the sale of azhi tokens is in the public sale stage with a price of around 1 BNB equivalent to 1,050,000 azhi which opened on 27 April 2022, AZHI is still very affordable and tempting for investors who are looking for long-term profits.

2. Azhi Token Platform

2.1. Platform Development Stages

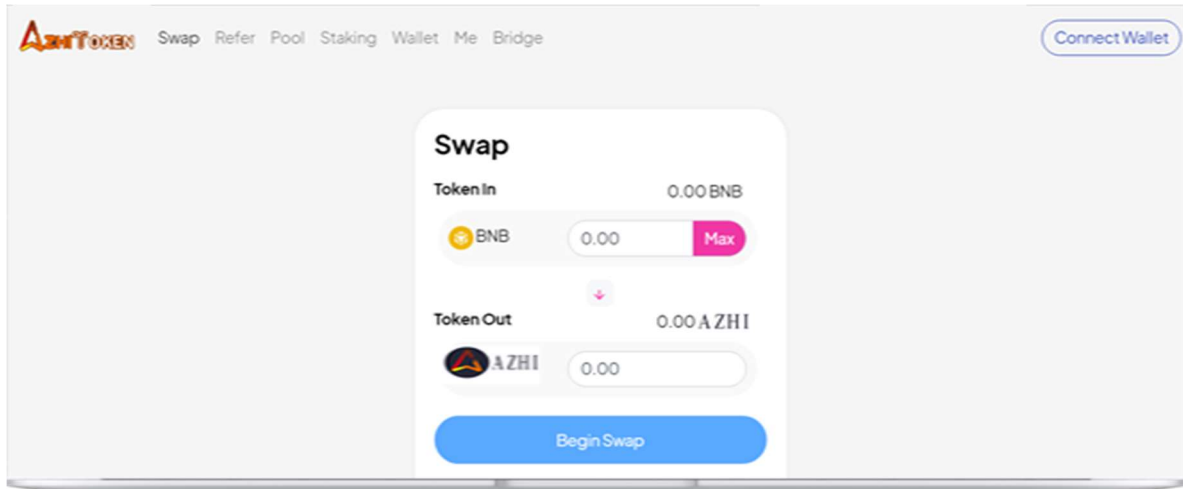

To determine the right platform, we consider several important things from the AZHI project that we will be working on. The final goal of the project, the funds to be used, the time of completion, the time involved to the opinions of the users are factors that need to be considered. Go Everything has to work in unison for the Azhi Token project to be successful.

2.2. Azhi Swap & Exchange

Azhi DEX is a leading DeFi DEX built on the Binance Smart Chain (BSC) which works similarly to other DEX Exchanges helping users trade between BEP20 tokens. azhi DEX is combined with many other features such as NFT, Yield Farming, Exchange, IFO and Voting which allows you to earn rewards.

Cryptocurrency Exchange with unlimited number of coins and fiat currency. azhi Exchange allows to store cryptocurrencies, banknotes and exchanges, trade on the spot market. Azhi (SPOT) supports Bitcoin, Ethereum, Ripple, Monero, Matic, Litecoin, Binance Coin and more trending coins, fiat currencies as well as all special ERC-20/BEP-20/TRC-20/Polygon based tokens.

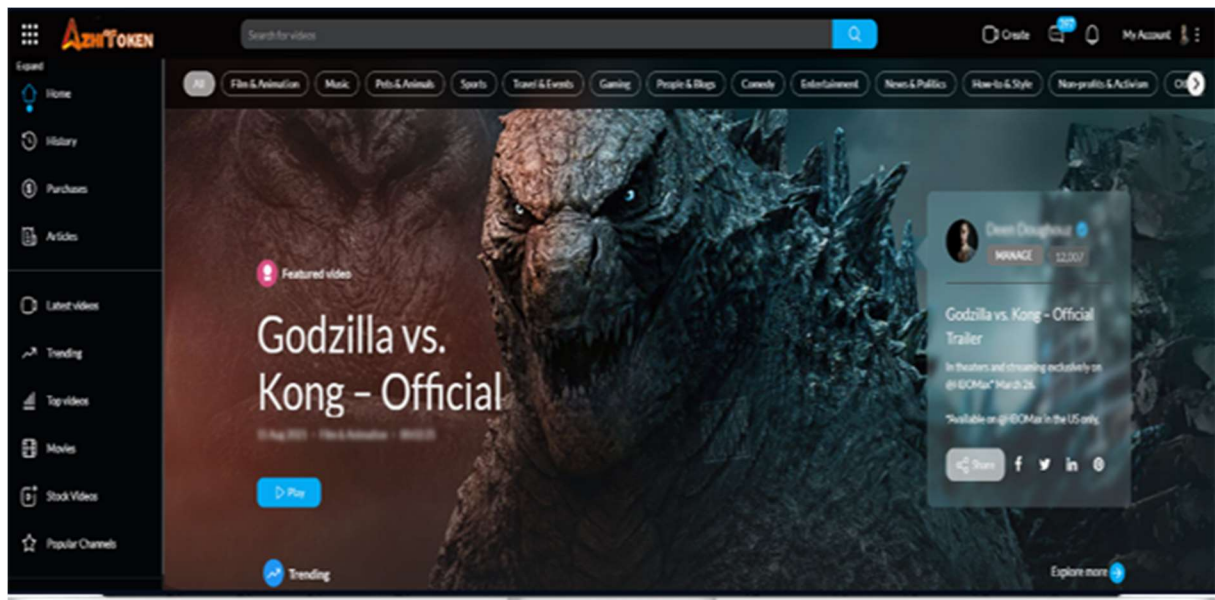

Professional AzhiSwap Interface

2.3. Azhi Live (WatchToEarn)

Azhi Live's mission is to build a fair video sharing platform. By sharing ad revenue among users, we want to give back to users and content creators what they really deserve.

"Turn your creativity into currency" Azhi Live is a real competitor in the arena of media sharing platforms. What is unique about azhi Live, compared to popular platforms, is the real earning potential it offers to Content Creators.

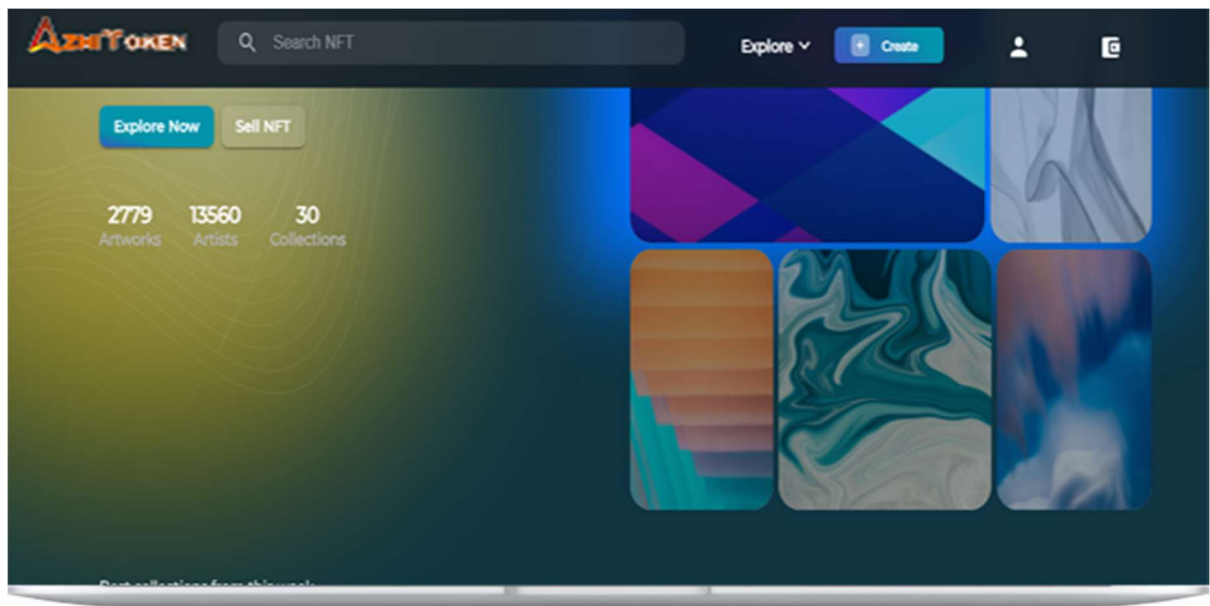

Professional AzhiLive Interface

2.4. NFT Marketplace

Before discussing how it works and the steps to buy it, we need to review what NFT is first. NFT is a digital asset that represents real-world objects such as painting, music art, in-game items, and short videos. They are bought and sold online, often paid for with cryptocurrency, and are generally coded using basic software similar to other crypto assets.

Create, sell and collect digital items. Unit of data stored on a digital ledger, called a blockchain, that certifies a digital asset to be unique and therefore not interchangeable

Create & Sell and Buy NFTs Filter NFTs You can track all your assets in a single page Track your transactions on Blockchain

Professional NFT Marketplace Interface

2.5. Metaverse

You will be able to go to virtual concerts, travel online, view or create artwork and try or buy digital clothing. The metaverse could also be a game changer for work-from-home shifts in the wake of the coronavirus pandemic.

Instead of seeing co-workers in a video call box, employees can join them in a virtual office. Facebook has launched meeting software for the company, called Horizon Workrooms, for use with its Oculus VR headset, though initial reviews have not been good. For those who can afford it, users will be able to, through their avatars, move between virtual worlds created by different companies.

This token will serve to bring value into the network, and to acquire new plots of land. AZHI can also be used to purchase goods and services in the virtual world.

3. AZHI Token

3.1. Tokenomics

AZHI Token (AZHI) created from the binance smart chain BEP20. with a total supply of 21 Billion AZHI made, will never be increased.

Token %	Amount (AZHI)	Vesting Period		Participant
		Initial Distribution Terms	Subsequent Distribution Terms	
5 %	105 Mn	No Lock Up	No Lock Up	Investor Public
14 %	294 Mn	Locked	Monthly distribution across 2 years and 6 months*	Investor Internal
28 %	588 Mn	No Lock Up	No Lock Up	Community Airdrop
26 %	546 Mn	Locked	Locked	Stake & AzhiLive
27%	567 Mn	Locked	Locked	Azhi Swap & Exchange

*Distribution period mentioned is excluding the initial lock up period.

3.2. Token Release Schedule

All times below are Chinese Standard Time (CST), UTC+8 hours.

Date	Task
2022/03/03	The confirmed start of the AZHI project
2022/03/29	Initial white paper draft completed, circulated to potential internal investors.
2022/04/25	Announcement of Airdrop and Public investor plans, and whitepaper release to the general public.
2022/04/27	public investors, started
2022/05/27	Public investors, or whenever AZHI is sold out. as well as pancake swap listing
2022/05/28	airdrop until the supply of 588 Mn azhi runs out

Public Investor and airdrop will start April 27, public investors can buy AZHI tokens in one phase based on first come first get it until 100 Mn Azhi tokens are sold and 500 Mn Azhi tokens airdrop runs out. This is intended to build a better circulation of azhi tokens.

3.3. Repurchasing plan

Every quarter, we will use 20% of our profits to buy back AZHI and destroy it, until we buy 50% of all AZHI back. All repurchase transactions will be announced. We will eventually destroy 1, Bn AZHI, leaving 1.1 Bn AZHI remaining.

3.4. Funds Usage

The use of AZHI investor funds is divided into two, namely public investors and internal investors.

3.4.1. Investor Internal funds

- 50% of internal investor funds will be used to build the AZHI platform, perform system upgrades. Partnership and ecosystem and Product and marketing.
- 50% of internal investor funds are given to the community through the airdrop program

3.4.2. Investor public funds

- 90% of public investors' funds will be used to increase the liquidity of azhi tokens and buybacks of AZHI
- 10% will be kept as a reserve to deal with any emergency or unforeseen situation that may arise.

3.5. Roadmaps

The use of cryptocurrencies has become more widespread and we have developed a comprehensive roadmap for AZHI future development.

4. Project Team

Profiles of founding team

Rocky Azhi | CEO

- ✓ In 2015, Rocky Azhi became a vocal crypto, and has since been the key driver behind the Azhi Token ethos.

Fengying Chen | COO

- ✓ Fengying Chen is the key figure behind Azhi crypto asset trading, apart from focusing on azhi token operations as COO.

Goro Hachiro | CSO

- ✓ In mid-2020, Goro Hachiro was selected as azhi CSO due to the success of his creative ideas and strategies.
